github.com/Naresh5885 | leetcode.com/u/Naresh10k/

An aspiring Artificial Intelligence and Machine Learning undergraduate with a strong interest in developing intelligent, real-world solutions using automation and data-driven systems. Experienced in developing AI-powered applications and scalable technology solutions with a focus on practical implementation and real-world impact. Committed to continuous learning, problem-solving, and applying emerging technologies to real-world challenges.

EDUCATION

B.E – Artificial Intelligence and Machine Learning

2023 – Present

V.S.B. Engineering College, Karur

- CGPA : 7.61
- Key Coursework: Machine Learning, Artificial Intelligence, Deep Learning, Natural Language Processing, Data Structures and Algorithms, Object Oriented Software Engineering.

TECHNICAL SKILLS

Programming Languages: Python, Java

Artificial Intelligence & Machine Learning: Machine Learning, Deep Learning, NLP, LLM, Generative AI

Cloud, Tools & Automation: AWS, Git, TensorFlow, Selenium, Python Automation

PROFESSIONAL EXPERIENCE

AIML Intern, Yobitel, Namakkal

Jan 2026 – Present

- Completed a one-month internship at Yobitel Communications Pvt. Ltd. (Dec 2025 – Jan 2026), gaining hands-on experience with Linux commands, AWS cloud-native technologies, and database integration concepts.
- Learned cloud-based application workflows, server management basics, and practical deployment practices in a real-world environment.

PROJECTS

BIOSYNC—Intelligent Biometric Attendance System

May 2024 – Present

- Built a smart biometric attendance system that automatically collects and processes attendance data from multiple biometric devices, reducing manual work and improving accuracy.
- Developed automated attendance reports with student-wise and department-wise tracking, real-time dashboard updates, and WhatsApp notifications for quick attendance communication.
- Added reliable automation features such as auto-recovery, retry handling, Google Drive backup, and role-based dashboards for admins, staff, parents, and students with mobile-friendly access.

EmotionDetectionMusic RecommendationSystem

- Developed an AI-powered web application that detects user emotions in real time using a deep learning model trained on the FER2013 dataset and recommends personalized music based on detected emotions.
- Built the system using TensorFlow, OpenCV, FastAPI, and Next.js with Spotify API integration for real-time emotion analysis and music recommendation.

FailureAwareAI

- Developed a FailureAware AI system using Retrieval-Augmented Generation (RAG) to provide reliable AI responses with confidence-based validation.
- Implemented semantic search and vector retrieval using Endee to reduce AI hallucinations and improve answer accuracy.

ADDITIONAL INFORMATION

Certifications: Machine Learning and Deep Learning - Fundamentals and Applications (NPTEL), Prompt Design in Vertex AI (Google Skills), Introduction to Prompt Engineering (SkillUp), Artificial Intelligence Primer Certification (Infosys)

Languages: English, Tamil
